## What's New in the?

Advertisement Publisher Description Amazing Slider is a complex software tool which enables you to create highly customizable slideshows from YouTube or Vimeo URLs, pictures or movies from your computer, and save the results as HTML files. The installation process is a piece of cake, while the interface sports a simple and modern design. This means both power and novice users can find their way around it, without experiencing issues of any kind. The program is built like a wizard, and as a first step lets you upload JPG, PNG, GIF, MP4, MOV and WEBM files, or paste URLs, as well as rotate or sort them according to title, date or name, and control the slide's width and height. The following panel enables you to choose a skin out of the built-in list, and adjust settings pertaining to slider, navigation, controls, borders, shadows, background and text effects, while the third tab requires you to pick transitions, as well as tinker with them. It is also possible to configure settings. To be more accurate, you can enable touch swipe, add required top to bottom margins, automatically play the slider for a custom number of times, pause on mouse over and randomize the playback. Last but not least, you can publish your project as a HTML file to the hard drive, as a WordPress plug-in, a Joomla or Drupal module. Help contents are provided online, while the computer's performance is not hampered. To sum up, Amazing Slider is an efficient piece of software and a good choice for people interested in creating amazing slideshows. It has a good response time, high quality results, user-friendly environment and plenty of options to tinker with.
