Well I only read the second part of this. Anyway, credit cards are almost the same as cash on everyone's banks. So, it's not hard to steal them. For the record, I have more than 100 cards. By the way, I have physical/mobile data, too. So, it's not so easy to steal or pinhole. Is it done by a hacker in vista, or a virus that has access to a credit card file. It's very hard to explain if the purpose is hacking.Q: What is the normal return in a LinearLayout I'm creating a form with a layout like so:
